## RESEARCH INTEREST

My research lies at the intersection of system security, sensor-driven computing, machine learning, and user-interactive systems, with a particular emphasis on safeguarding the channels through which humans interact with smart systems. I focus on adversarial attacks, side/covert channels, and the design of practical, user-friendly defenses that address real-world constraints.

- Trustworthy and privacy-preserving ML/AI: Adversarial ML; Prompt injection; AI misinformation and misuse.
- CPS/Mobile security and privacy: Covert and side channels; Sensor-driven adversarial perception; Privacy protection.
- Communication security: NFC; Optical fiber communication; UAV navigation and control-link.

## EDUCATION

- **University of Kansas** Lawrence, Kansas, United States  
Ph.D. in Computer Science, Department of Electrical Engineering and Computer Science  
Jan. 2020 – Present  
Advisor: [Prof. Fengjun Li](#) & [Prof. Bo Luo](#)
- **Beihang University** Beijing, China  
M.Eng. in Optical Engineering, School of Instrumentation Science and Optoelectronic Engineering  
Sep. 2011 – Mar. 2014  
Advisor: [Prof. Xiaoxiao Wang](#)
- **Beihang University** Beijing, China  
B.S. in Electronic Engineering, School of Instrumentation Science and Optoelectronic Engineering  
Sep. 2007 – Jul. 2011  
Advisor: [Prof. Zhongyi Chu](#)

## RESEARCH AND PROFESSIONAL EXPERIENCE

---

- **Institute for Information Sciences, University of Kansas**

Lawrence, Kansas, United States

Graduate Research Assistant

Jan. 2020 – Present

- Non-intrusive physical-layer masking for preventing side-channel leaks via accelerometers.
- Combining motion-sensor side channels with covert vibration channels to form a practical attack chain.
- Stealthy sensor-enabled logic bombs for Android that evade static analysis, dynamic analysis, and user awareness.
- Proactive deepfakes face swap defense with identity /context protection and forensic tracing.
- Develop an effective physical adversarial attack against face recognition CNN models.

- **Institute of Information Engineering, Chinese Academy of Sciences**

Beijing, China

Assistant Research Scientist

Mar. 2014 – Dec. 2019

- Designed and implemented GPS spoofing detection techniques for UAV navigation.
- Developed a fiber-optic communication system security monitoring framework, focusing on intrusion detection.
- Developed an unauthorized recording device detection system based on weak magnetic signal analysis.
- Conducted research on security modeling for Near-Field Communication (NFC) devices.

- **Institute of Optoelectronics Technology, Beihang University**

Beijing, China

Graduate Research Assistant

Sep. 2011 – Mar. 2014

- Conducted research to improve the dynamic response and measurement accuracy of fiber-optic current transformers.

## HONORS AND AWARDS

---

- Doctoral Student Research Fund Award – University of Kansas (KU) 2025
- Graduate Engineering Association Award – KU 2024, 2025
- DAVID D. and MILDRED H. ROBB AWARD – EECS, KU 2024
- ACM CCS Travel Grant Award – ACM SIGSAC, NSF 2024
- Graduate Student Travel Fund – KU Student Senate 2024, 2025
- CANSec Workshop Travel Grant Award – CANSec, NSF 2022, 2024, 2025
- The second prize of the Science and Technology Award – MIIT (PRC) 2019
- Excellent Researcher – Institute of Information Engineering, CAS 2016, 2018
- Outstanding Master's Thesis Award – Beihang University 2014
- Science and Technology Award – Ministry of Education, PRC 2013
- Graduate Guanghua Scholarship – Beihang University 2013
- Outstanding Undergraduate Thesis Award – Beihang University 2011

## TEACHING EXPERIENCE

---

- **Graduate Teaching Assistant**

University of Kansas

- EECS 268: Programming II Spring 2025  
Instructor: *Dr. John Gibbons*
- EECS 569: Computer Forensics Fall 2024  
Instructor: *Dr. Bo Luo*
- EECS 565: Introduction to Information and Computer Security Fall 2025, 2024, 2023  
Instructor: *Dr. Fengjun Li*
- EECS 447: Introduction to Database Systems Spring 2026, 2024, 2023  
Instructor: *Dr. Bo Luo*

- **Teaching Assistant**

University of Chinese Academy of Sciences

- Physical Space Information Security Spring, 2017  
Instructor: *Prof. Degang Sun*

## MENTORING EXPERIENCE

---

1. Yuying Li, PhD student, The University of Kansas, 01/2025-present  
Project: A novel attack chain to improve the practicality of side channel attacks
2. Weihang Hu, master student, University of Chinese Academy of Sciences, 9/2018-9/2019  
Project: CNN-based electromagnetic spectrum analysis (Master's thesis)
3. Navya Nittala and Sophia Jacob, undergraduate students, The University of Kansas, 5/2024-12/2024  
Project: Motion sensor information leakage protection

## CONFERENCE PRESENTATION

---

- A novel fully sensor-driven attack chain, Annual Computer Security Applications Conference (ACSAC) poster session, December 11th, 2025, Honolulu, Hawaii, USA
- Invited talk: A novel fully sensor-driven attack chain, I2S Student Organization (ISO) Meeting, October 23rd, 2025, Nichols Hall, The University of Kansas.
- Agile: An Effective Laser-Based Physical Adversarial Attack against Face Recognition, AI summit *Falling into AI* with Google, October 1st, 2025, Nichols Hall, The University of Kansas.
- The Invisible Polyjuice Potion: An Effective Physical Adversarial Attack against Face Recognition, ACM SIGSAC Conference on Computer and Communications Security (CCS '24), October 17th, 2024, Salt Lake City.
- The Invisible Polyjuice Potion: An Effective Physical Adversarial Attack against Face Recognition, The Central Area Networking and Security Workshop (CANSec) 2024, October 12th, 2024, University of Oklahoma, Norman, OK.
- Stealthily evading surveillance-camera face recognition, FBI and KU Cybersecurity Conference, April 4th, 2024, KU Memorial Union, the University of Kansas.
- Laser man against unauthorized facial recognition systems, The I2S Student Research Symposium (ISRS), March 3rd, 2023, Nichols Hall, The University of Kansas.

## PROFESSIONAL MEMBERSHIPS

---

- ACM SIGSAC Membership

## PROFESSIONAL SERVICE

---

### Paper Review

- Journal reviewer for Neural Networks
- Journal reviewer for IEEE Transactions on Dependable and Secure Computing (TDSC)
- External paper reviewer: ACM SIGSAC Conference on Computer and Communications Security (CCS 2025)
- External paper reviewer: the 44th IEEE International Conference on Distributed Computing Systems (ICDCS 2024)
- External paper reviewer: Annual IEEE/IFIP International Conference on Dependable Systems and Networks (DSN 2023)
- External paper reviewer: the Annual Computer Security Applications Conference (ACSAC 2023)
- External paper reviewer: Annual IEEE/IFIP International Conference on Dependable Systems and Networks (DSN 2022)
- External paper reviewer: IEEE International Conference on Trust, Security and Privacy in Computing and Communications (TrustCom 2022)

### Community Service

- GenCyber Teacher Camp, Student Volunteer and Teaching Assistant, Funded by NSA and NSF, 2023
- GEA Research Symposium, Student Judge, University of Kansas, 2023
- Session Moderator for EAI SecureComm, 2022
